

Yinson GreenTech launches chargEV 2.0 app with improved charging experience

- The refreshed chargEV 2.0 app now delivers a faster, simpler charging experience that is shaped by more than one million charging sessions and growing.
- chargEV continues to expand its charging network at high-traffic locations and townships, while also supporting more convenient cross-border charging through roaming interoperability.

KUALA LUMPUR, 27 JULY 2026 - Yinson GreenTech, through its electric vehicle (EV) charging infrastructure business, chargEV, introduces chargEV 2.0, a refreshed mobile app designed to make EV charging easier for everyday drivers.

The announcement also marks chargEV's milestone of facilitating one million charging sessions since Yinson GreenTech acquired the business back in 2022. The upgrade leverages insights gained from over a decade of operational experience as one of Malaysia's leading charge point operators.

Built with the EV user in mind, chargEV 2.0 is designed to make charging simple, intuitive and fast. Highlights include a cleaner look, one-click charging and AutoCharge, which helps improve charging convenience and experience at the charging point. The app also features enhanced maps, live activities monitoring and improved trip planning capabilities. A detailed factsheet of the chargEV 2.0 app is appended to this press release.

Kelvin Soon, Yinson GreenTech Managing Director of EV Charging and Leasing said, "We are proud to have reached the milestone of one million charging sessions. These sessions have given us a clearer view of how drivers use public charging and where unnecessary friction occurs. chargEV 2.0 transforms those insights into practical improvements, while we continue expanding the network in locations that fit into everyday journeys. Our focus is simple: to help drivers spend less time navigating the charging process and more time on the move."

Through the new chargEV 2.0 app, users can enjoy a more seamless charging experience across a nationwide network covering everyday destinations such as shopping malls, hotels, retail outlets, automotive dealerships, offices and high-traffic urban locations. By providing a practical mix of AC and DC chargers where people live, work and travel, chargEV makes it easier for EV drivers to integrate charging naturally into their daily routines.

The launch of chargEV 2.0 is supported by chargEV's continued network upgrades and expansion across Malaysia. This includes strengthening high-traffic sites, improving charger availability at existing locations and expanding into areas where charging access remains limited. Recent deployments include Merdeka 118, selected AEON Mall locations and at towns such as Gemas, Raub, Teluk Intan and Kuala Kangsar. chargEV is committed to progressively deploy fast chargers along key Malaysian highway corridors, providing drivers with greater confidence and convenience for long-distance and interstate travel.

These efforts reflect chargEV's broader efforts towards EV adoption by bridging both the EV charging infrastructure and digital touchpoints, making it convenient for EV drivers to access its interoperable network in Malaysia and across borders.

The all-new chargEV 2.0 app will be available to users on 28 July 2026 via the App Store or Google Play.

FACTSHEET – chargEV 2.0 features

This factsheet summarises the key features offered by the all-new chargEV 2.0 app. Feature availability may depend on the user's device, vehicle and charger.

chargEV 2.0 features	Benefits
Cleaner, faster experience	The app has been redesigned and rearchitected to be more responsive, with software and performance improvements that help users move through common charging actions more quickly.
One-click charging	When a connector is plugged in, the app highlights the connected charger so the EV user can start charging in one step.
AutoCharge*	After a simple one-time onboarding process, compatible vehicles and chargers can authenticate and begin charging automatically when plugged in, without the EV user needing to open the app, enter payment details. *Important compatibility note <i>AutoCharge and device-level live updates are subject to applicable vehicle, charger and device support. Users should refer to the latest in-app information and onboarding prompts for availability.</i>
Enhanced map	A more responsive map, improved filters and repositioned controls help EV users find a suitable charging point with less effort.
Live Activities	EV users can follow charging progress in real-time, including lock-screen updates on supported devices.
Saved destinations	Quick access to frequently used destinations supports simpler repeat journeys.
Updated profile experience	The refreshed app includes improved profile management that displays your important information such as your EV, membership plan, vouchers and payment method.
User feedback	Users can share feedback or request support at support@chargev.my .

How to get started

Download the chargEV app or update to the latest version:

- Apple Store - <https://apps.apple.com/my/app/chargev/id1587265115>

- Google Play - <https://play.google.com/store/apps/details?id=com.manjalabs.chargeev&hl=en>
Explore the refreshed experience and share your feedback through support@chargev.my.
